	Glossary	18

1. INTRODUCTION

- 1.1. The Human Immunodeficiency Virus (HIV) and the Acquired Immune Deficiency Syndrome (AIDS) are serious public health problems, which have socio economic, employment and human rights implications.
- 1.2. It is recognised that the HIV/AIDS epidemic will affect every workplace, with prolonged staff illness, absenteeism, and death impacting on productivity, employee benefits, occupational health and safety, production costs and workplace morale.
- 1.3. HIV knows no social, gender, age or racial boundaries, but it is accepted that socio-economic circumstances do influence disease patterns. HIV thrives in an environment of poverty, rapid urbanisation, violence and destabilisation. Transmission is exacerbated by disparities in resources and patterns of migration from rural to urban areas. Women, particularly are more vulnerable to infection in cultures and economic circumstances where they have little control over their lives.
- 1.4. Furthermore HIV/AIDS is still a disease surrounded by ignorance, prejudice, discrimination and stigma. In the workplace unfair discrimination against people living with HIV and AIDS has been perpetuated through practices such as pre-employment HIV testing, dismissals for being HIV positive and the denial of employee benefits.
- 1.5. One of the most effective ways of reducing and managing the impact of HIV/AIDS in the workplace is through the implementation of an HIV/AIDS policy and programme. Addressing aspects of HIV/AIDS in the workplace will enable employers, trade unions and government to actively contribute towards local, national and international efforts to prevent and control HIV/AIDS. In light of this, the Code has been developed as a guide to employers, trade unions and employees.
- 1.6. Furthermore the Code seeks to assist with the attainment of the broader goals of:
 - eliminating unfair discrimination in the workplace based on HIV status;

- promoting a non-discriminatory workplace in which people living with HIV or AIDS are able to be open about their HIV status without fear of stigma or rejection;
- promoting appropriate and effective ways of managing HIV in the workplace;
- creating a balance between the rights and responsibilities of all parties.

2. OBJECTIVES

2.1. The Code's primary objective is to set out guidelines for employers and the trade union within the textile manufacturing industry to implement so as to ensure individuals with HIV infection are not unfairly discriminated against in the workplace. This includes provisions regarding:

- (i) creating a non-discriminatory work environment;
- (ii) dealing with HIV testing, confidentiality and disclosure;
- (iii) providing equitable employee benefits;
- (iv) dealing with dismissals; and
- (v) managing grievance procedures.

2.2. The Code's secondary objective is to provide a policy for employers, employees and the trade union within the textile manufacturing industry on how to manage HIV/AIDS within the workplace. Since the HIV/AIDS epidemic impacts upon the workplace and individuals at a number of different levels, it requires a holistic response which takes all of these factors into account. The Code therefore includes principles, which are dealt with in more detail under the statutes listed in item 5.1., on the following:

- (i) creating a safe working environment for all employers and employees;
- (ii) developing procedures to manage occupational incidents and claims for compensation;
- (iii) introducing measures to prevent the spread of HIV;
- (iv) developing strategies to assess and reduce the impact of the epidemic upon the workplace; and
- (v) supporting those individuals who are infected or affected by HIV/AIDS so that they may continue to work productively for as long as possible.

2.3 In addition, the Code promotes the establishment of mechanisms to foster co-operation at the following levels:

- (i) between employers, employees and the trade union in the workplace; and
- (ii) between the workplace and other stakeholders at a sectoral, local, provincial and national level.

3. CODE PRINCIPLES

- 3.1. The promotion of equality and non-discrimination between individuals with HIV infection and those without, and between HIV/AIDS and other comparable health/medical conditions.
- 3.2. The creation of a supportive environment so that HIV infected employees are able to continue working under normal conditions in their current employment for as long as they are medically fit to do so.
- 3.3. The protection of human rights and dignity of people living with HIV or AIDS is essential to the prevention and control of HIV/AIDS.
- 3.4. HIV/AIDS impacts disproportionately on women and this should be taken into account in the development of workplace policies and programmes.
- 3.5. Consultation, inclusivity and encouraging full participation of all stakeholders are key principles which should underpin every HIV/AIDS policy and programme.

4. APPLICATION AND SCOPE

- 4.1. All employers and employees within the textile manufacturing industry, and their respective organisations are encouraged to use this Code to develop, implement and refine their HIV/AIDS policies and programmes to suit the needs of their workplaces.
- 4.2. This Code however does not impose any legal and/or financial obligation in addition to those in the Employment Equity Act, the Labour Relations Act, and this code or in any other legislation referred to in the Code.

- 4.3. The Code should be read in conjunction with other codes of good practice that may be issued by the Minister of Labour.

5. LEGAL FRAMEWORK

- 5.1. The Code should be read in conjunction with the Constitution of South Africa Act, No. 108 of 1996, and all relevant Legislation which includes the following:

- (i) Employment Equity Act, No. 55 of 1998;
- (ii) Labour Relations Act, No. 66 of 1995;
- (iii) Occupational Health and Safety Act, No. 85 of 1993;
- (iv) Compensation for Occupational Injuries and Diseases Act, No. 130 of 1993;
- (v) Basic Conditions of Employment Act, No. 75 of 1997; and
- (vi) Medical Schemes Act, No. 131 of 1998.
- (vii) Promotion of Equality and Prevention of Unfair Discrimination Act, No. 4 of 2000.

- 5.2. The contents of this code should be taken into account when developing, implementing or reviewing any workplace policies or programmes in terms of the statutes listed above.

- 5.3. The following are selected, relevant sections contained in certain of the above-mentioned legislation. These should be read in conjunction with other legislative provisions.

- 5.3.1. The Code is issued in terms of Section 54(1)(a) of the Employment Equity Act, No 55 of 1998 and is based on the principle that no person may be unfairly discriminated against on the basis of their HIV status. In order to assist employers and employees to apply this principle consistently in the workplace, the Code makes reference to other pieces of legislation.

- 5.3.2. Section 6(1) of the Employment Equity Act provides that no person may unfairly discriminate against an employee, or an applicant for employment, in any employment policy or practice, on the basis of his or her HIV status. In any legal proceedings in which it is alleged that any employer has discriminated unfairly, the employer must prove that any discrimination or differentiation was fair.

5.3.3. No employee, or applicant for employment, may be required by their employer to undergo an HIV test in order to ascertain their HIV status. HIV testing by or on behalf of an employer

may only take place where the Labour Court has declared such testing to be justifiable in accordance with Section 7(2) of the Employment Equity Act.

5.3.4. In accordance with Section 187(1)(f) of the Labour Relations Act, No. 66 of 1995, an employee with HIV/AIDS may not be dismissed simply because he or she is HIV positive or has AIDS. However where there are valid reasons related to their capacity to continue working and fair procedures have been followed, their services may be terminated in accordance with Section 188(1)(a)(i).

5.3.5. In terms of Section 8(1) of the Occupational Health and Safety Act, No. 85 of 1993; an employer is obliged to provide, as far as is reasonably practicable, a safe workplace. This may include ensuring that the risk of occupational exposure to HIV is minimised.

5.3.6. An employee who is infected with HIV as a result of an occupational exposure to infected blood or bodily fluids, may apply for benefits in terms of Section 22(1) of the Compensation for Occupational Injuries and Diseases Act, No. 130 of 1993.

5.3.7. In accordance with the Basic Conditions of Employment Act, No. 75 of 1997, every employer is obliged to ensure that all employees receive certain basic standards of employment, including a minimum number of days sick leave [Section 22(2)].

5.3.8. In accordance with Section 24(2)(e) of the Medical Schemes Act, No 131 of 1998, a registered medical aid scheme may not unfairly discriminate directly or indirectly against its members on the basis of their "state of health". Further in terms of s 67(1)(9) regulations may be drafted stipulating that all schemes must offer a minimum level of benefits to their members.

5.3.9. In accordance with both the common law and Section 14 of the Constitution of South Africa Act, No. 108 of 1996, all persons with HIV or AIDS have a right to privacy, including privacy concerning their HIV or AIDS status. Accordingly there is no general legal duty on an employee to disclose his or her HIV status to their employer or to other employees.

6. PROMOTING A NON-DISCRIMINATORY WORK ENVIRONMENT

6.1. No person with HIV or AIDS shall be unfairly discriminated against within the employment relationship or within any employment policies or practices, including with regard to:

- (i) recruitment procedures, advertising and selection criteria;
- (ii) appointments, and the appointment process, including job placement;
- (iii) job classification or grading;
- (iv) remuneration, employment benefits and terms and conditions of employment;
- (v) employee assistance programmes;
- (vi) job assignments;
- (ix) training and development;
- (x) performance evaluation systems;
- (xi) promotion, transfer and demotion;
- (xiii) termination of services.

6.2. To promote a non-discriminatory work environment based on the principle of equality, employers and trade unions should adopt appropriate measures to ensure that employees with HIV and AIDS are not unfairly discriminated against and are protected from victimisation through positive measures such as:

- (i) preventing unfair discrimination and stigmatisation of people living with HIV or AIDS through the development of HIV/AIDS policies and programmes for the workplace;
- (ii) awareness, education and training on the rights of all persons with regard to HIV and AIDS;
- (iii) mechanisms to promote acceptance and openness around HIV/AIDS in the workplace;
- (iv) providing support for all employees infected or affected by HIV and AIDS; and

- (v) grievance procedures and disciplinary measures to deal with HIV-related complaints in the workplace.

7. HIV TESTING, CONFIDENTIALITY AND DISCLOSURE

7.1. HIV Testing

7.1.1. No employer may require an employee, or an applicant for employment, to undertake an HIV test in order to ascertain that employee's HIV status. As provided for in the Employment Equity Act, employers may approach the Labour Court to obtain authorisation for testing.

7.1.2. Whether s 7(2) of the Employment Equity Act prevents an employer-provided health service supplying a test to an employee who requests a test, depends on whether the Labour Courts would accept that an employee can knowingly agree to waive the protection in the section. This issue has not yet been decided by the courts. 1[2]

7.1.3. In implementing the sections below, it is recommended that parties take note of the position set out in item 7.1.2.

7.1.4. Authorised testing

Employers must approach the Labour Court for authorisation in, amongst others, the following circumstances:

- (i) during an application for employment;
- (ii) as a condition of employment;

1[2] The Employment Equity Act does not make it a criminal offence for an employer to conduct a test in violation of s 7(2). However an employee who alleges that his or her right not to be tested has been violated may refer a dispute to the National Bargaining Council for conciliation, and if this does not resolve the dispute, to the Labour Court for determination.

- (iii) during procedures related to termination of employment;
- (iv) as an eligibility requirement for training or staff development programmes; and
- (v) as an access requirement to obtain employee benefits.

7.1.5. Permissible testing

- (a) An employer may provide testing to an employee who has requested a test in the following circumstances:
 - (i) As part of a health care service provided in the workplace;
 - (ii) In the event of an occupational accident carrying a risk of exposure to blood or other body fluids;
 - (iii) For the purposes of applying for compensation following an occupational accident involving a risk of exposure to blood or other body fluids.
- (b) Furthermore, such testing may only take place within the following defined conditions:
 - (i) At the initiative of an employee;
 - (ii) Within a health care worker and employee-patient relationship;
 - (iii) With informed consent and pre- and post-test counselling, as defined by the Department of Health's National Policy on Testing for HIV; and
 - (iv) With strict procedures relating to confidentiality of an employee's HIV status as described in clause 7.2 of this Code.

7.1.6 All testing, including both authorised and permissible testing, should be conducted in accordance with the Department of Health's National Policy on Testing for HIV issued in terms of the National Policy for Health Act, No. 116 of 1990.

7.1.7. Informed consent means that the individual has been provided with information, understands it and based on this has agreed to undertake the HIV test. It implies that the individual understands what the test is, why it is necessary, the benefits, risks, alternatives and any possible social implications of the outcome.

7.1.8. Anonymous, unlinked surveillance or epidemiological HIV testing in the workplace may occur provided it is undertaken in accordance with ethical and legal principles regarding such research.^{2[3]} Where such research is done, the information obtained may not be used to unfairly discriminate against individuals or groups of persons. Testing will not be considered anonymous if there is a reasonable possibility that a person's HIV status can be deduced from the results.

7.2. Confidentiality and Disclosure

7.2.1. All persons with HIV or AIDS have the legal right to privacy. An employee is therefore not legally required to disclose his or her HIV status to their employer or to other employees.

7.2.2. Where an employee chooses to voluntarily disclose his or her HIV status to the employer or to other employees, this information may not be disclosed to others without the employee's express written consent. Where written consent is not possible, steps must be taken to confirm that the employee wishes to disclose his or her status.

7.2.3. Mechanisms should be created to encourage openness, acceptance and support for those employers and employees who voluntarily disclose their HIV status within the workplace, including:

- (i) encouraging persons openly living with HIV or AIDS to conduct or participate in education, prevention and awareness programmes;
- (ii) encouraging the development of support groups for employees living with HIV or AIDS; and
- (iii) ensuring that persons who are open about their HIV or AIDS status are not unfairly discriminated against or stigmatised.

8. PROMOTING A SAFE WORKPLACE

8.1 An employer is obliged to provide and maintain, as far as is reasonably practicable, a workplace that is safe and without risk to the health of its employees.

^{2[3]} See amongst others the Department of Health's National Policy for Testing for HIV and the Biological Hazardous Agents Regulations.

8.2 The risk of HIV transmission in the workplace is minimal. However occupational accidents involving bodily fluids may occur, particularly in the health care professions. Every workplace should ensure that it complies with the provisions of the Occupational Health and

Safety Act, including the Regulations on Hazardous Biological Agents, and that its policy deals with, amongst others:

- (i) the risk, if any, of occupational transmission within the particular workplace;
- (ii) appropriate training, awareness, education on the use of universal infection control measures so as to identify, deal with and reduce the risk of HIV transmission in the workplace;
- (iii) providing appropriate equipment and materials to protect employees from the risk of exposure to HIV;
- (iv) the steps that must be taken following an occupational accident including the appropriate management of occupational exposure to HIV and other blood borne pathogens, including access to post-exposure prophylaxis;
- (v) the procedures to be followed in applying for compensation for occupational infection;
- (vi) the reporting of all occupational accidents; and
- (vii) adequate monitoring of occupational exposure to HIV to ensure that the requirements of possible compensation claims are being met.

9. COMPENSATION FOR OCCUPATIONALLY ACQUIRED HIV

9.1. An employee may be compensated if he or she becomes infected with HIV as a result of an occupational accident, in terms of the Compensation for Occupational Injuries and Diseases Act.

Employers should take reasonable steps to assist employees with the application for benefits including:

- (i) providing information to affected employees on the procedures that will need to be followed in order to qualify for a compensation claim; and
- (ii) assisting with the collection of information which will assist with proving that the employees were occupationally exposed to HIV infected blood.

9.2. Occupational exposure should be dealt with in terms of the Compensation for Occupational Injuries and Diseases Act. Employers should ensure that they comply with the provisions of this Act and any procedure or guideline issued in terms thereof.

10. EMPLOYEE BENEFITS

- 10.1. Employees with HIV or AIDS may not be unfairly discriminated against in the allocation of employee benefits.
- 10.2. Employees who become ill with AIDS should be treated like any other employee with a comparable life threatening illness with regard to access to employee benefits.
- 10.3. Information from benefit schemes on the medical status of an employee should be kept confidential and should not be used to unfairly discriminate.
- 10.4. Where an employer offers a medical scheme as part of the employee benefit package it must ensure that this scheme does not unfairly discriminate, directly or indirectly, against any person on the basis of his or her HIV status.

11. DISMISSAL

- 11.1. Employees with HIV/AIDS may not be dismissed solely on the basis of their HIV/AIDS status.
- 11.2. Where an employee has become too ill to perform their current work, an employer is obliged to follow accepted guidelines regarding dismissal for incapacity before terminating an employee's services, as set out in the Code of Good Practice on Dismissal contained in Schedule 8 of the Labour Relations Act.
- 11.3. The employer should ensure that as far as possible, the employee's right to confidentiality regarding his or her HIV status is maintained during any incapacity proceedings. An

employee cannot be compelled to undergo an HIV test or to disclose his or her HIV status as part of such proceedings unless the Labour Court authorised such a test.

12. GRIEVANCE PROCEDURES

- 12.1. Employers should ensure that the rights of employees with regard to HIV/AIDS, and the remedies available to them in the event of a breach of such rights, become integrated into existing grievance procedures.
- 12.2. Employers should create an awareness and understanding of the grievance procedures and how employees can utilise them.
- 12.3. Employers should develop special measures to ensure the confidentiality of the complainant during such proceedings, including ensuring that such proceedings are held in private.

13. MANAGEMENT OF HIV IN THE WORKPLACE

- 13.1. The effective management of HIV/AIDS in the workplace requires an integrated strategy that includes, amongst others, the following elements:
 - 13.1.1. An understanding and assessment of the impact of HIV/AIDS on the workplace; and
 - 13.1.2. Long and short term measures to deal with and reduce this impact, including:

- (i) An HIV/AIDS Policy for the workplace
- (ii) HIV/AIDS Programmes, which would incorporate:
 - (a) Ongoing sustained prevention of the spread of HIV among employees and their communities;
 - (b) Management of employees with HIV so that they are able to work productively for as long as possible; and
 - (c) Strategies to deal with the direct and indirect costs of HIV/AIDS in the workplace.

14. ASSESSING THE IMPACT OF HIV/AIDS ON THE WORKPLACE

- 14.1. Employers and trade union should develop appropriate strategies to understand, assess and respond to the impact of HIV/AIDS in their particular workplace and sector. This should be done in cooperation with sectoral, local, provincial and national initiatives by government, civil society and non-governmental organisations.
- 14.2. Broadly, impact assessments should include:
- (i) Risk profiles; and
 - (ii) Assessment of the direct and indirect costs of HIV/AIDS;
- 14.3. Risk profiles may include an assessment of the following:
- (i) The vulnerability of individual employees or categories of employees to HIV infection;
 - (ii) The nature and operations of the organisation and how these may increase susceptibility to HIV infection (eg migrancy or hostel dwellings);
 - (iii) A profile of the communities from which the organisation draws its employees;
 - (iv) A profile of the communities surrounding the organisation's place of operation; and
 - (v) An assessment of the impact of HIV/AIDS upon their target markets and client base.
- 14.4. The assessments should also consider the impact that the HIV/AIDS epidemic may have on:
- (i) Direct costs such as costs to employee benefits, medical costs and increased costs related to staff turnover such as training and recruitment costs and the costs of implementing an HIV/AIDS programme;
 - (ii) Indirect costs such as costs incurred as a result of increased absenteeism, employee morbidity, loss of productivity, a general decline in workplace morale and possible workplace disruption;
- 14.5. The cost effectiveness of any HIV/AIDS interventions should also be measured as part of an impact assessment.

15. MEASURES TO DEAL WITH HIV/AIDS WITHIN THE WORKPLACE

15.1. A Workplace HIV/AIDS Policy

15.1.1. Every workplace should develop an HIV/AIDS policy^{3[4]}, in order to ensure that employees affected by HIV/AIDS are not unfairly discriminated against in employment policies and practices. This policy code should cover:

- (i) the organisation's position on HIV/AIDS;
- (ii) an outline of the HIV/AIDS programme;
- (iii) details on employment policies (e.g. position regarding HIV testing, employee benefits, performance management and procedures to be followed to determine medical incapacity and dismissal);
- (iv) express standards of behaviour expected of employers and employees and appropriate measures to deal with deviations from these standards;
- (v) grievance procedures in line with item 12 of this Code;
- (vi) set out the means of communication within the organisation on HIV/AIDS issues;
- (vii) details of employee assistance available to persons affected by HIV/AIDS;
- (viii) details of implementation and coordination responsibilities; and
- (ix) monitoring and evaluation mechanisms.

15.1.2. All policies should be developed in consultation with key stakeholders within the workplace including trade unions, employee representatives, occupational health staff and the human resources department.

15.1.3. The policy should reflect the nature and needs of the particular workplace.

15.1.4. Policy development and implementation is a dynamic process, so the workplace policy should be:

- (i) communicated to all concerned;
- (ii) routinely reviewed in light of epidemiological and scientific information; and
- (iii) monitored for its successful implementation and evaluated for its effectiveness.

15.2. Developing Workplace HIV/AIDS Programmes

^{3[4]} This policy could either be a specific policy on HIV/AIDS, or could be incorporated in a policy on life threatening illness.

15.2.1. It is recommended that every workplace works towards developing and implementing a workplace HIV/AIDS programme aimed at preventing new infections, providing care and support for employees who are infected or affected, and managing the impact of the epidemic in the organisation.

15.2.2. The nature and extent of a workplace programme should be guided by the needs and capacity of each individual workplace. However, it is recommended that every workplace programme should attempt to address the following in cooperation with the sectoral, local, provincial and national initiatives:

- (i) hold regular HIV/AIDS awareness programmes;
- (ii) encourage voluntary testing;
- (iii) conduct education and training on HIV/AIDS;
- (iv) promote condom distribution and use;
- (v) encourage health seeking behaviour for STD's;
- (vi) enforce the use of universal infection control measures;
- (vii) create an environment that is conducive to openness, disclosure and acceptance amongst all staff;
- (viii) endeavour to establish a wellness programme for employees affected by HIV/AIDS;
- (ix) provide access to counselling and other forms of social support for people affected by HIV/AIDS;
- (x) maximise the performance of affected employees through reasonable accommodation, such as investigations into alternative sick leave allocation;
- (xi) develop strategies to address direct and indirect costs associated with HIV/AIDS in the workplace, as outlined under item 14.4
- (xii) regularly monitor, evaluate and review the programme.

15.2.3. Employers should take all reasonable steps to assist employees with referrals to appropriate health, welfare and psycho-social facilities within the community, if such services are not provided at the workplace

16. INFORMATION AND EDUCATION

- 16.1. The National Textile Bargaining Council should ensure that copies of this code are available and accessible.
- 16.2. Employers and employer organisations should include the Code in their orientation, education and training programmes of employees.
- 16.3. The trade union should include the Code in their education and training programmes of shop stewards and employees.

GLOSSARY

<i>Affected employee</i>	an employee who is affected in any way by HIV/AIDS eg if they have a partner or a family member who is HIV positive
<i>AIDS</i>	AIDS is the acronym for “acquired immune deficiency syndrome”. AIDS is the clinical definition given to the onset of certain life-threatening infections in persons whose immune systems have ceased to function properly as a result of infection with HIV.
<i>Epidemiological</i>	The study of disease patterns, causes, distribution and mechanisms of control in society.
<i>HIV</i>	HIV is the acronym for “human immuno deficiency virus”. HIV is a virus which attacks and may ultimately destroy the body’s natural immune system.
<i>HIV testing</i>	taking a medical test to determine a person’s HIV status. This may include written or verbal questions inquiring about previous HIV tests; questions related to the assessment of ‘risk behavior’ (for example questions regarding sexual practices, the number of sexual partners or sexual orientation); and any other indirect methods designed to ascertain an employee’s or job applicant’s HIV status.
<i>HIV positive</i>	having tested positive for HIV infection.
<i>Infected employee</i>	an employee who has tested positive for HIV or who has been diagnosed as having HIV/AIDS.
<i>Informed consent</i>	a process of obtaining consent from a patient which ensures that the person fully understands the nature and implications of the test before giving his or her agreement to it.

<i>Policy</i>	a document setting out an organisation's position on a particular issue.
<i>Pre and post test counseling</i>	a process of counseling which facilitates an understanding of the nature and purpose of the HIV test. It examines what advantages and disadvantages the test holds for the person and the influence the result, positive or negative, will have on them.
<i>Reasonable Accommodation</i>	means any modification or adjustment to a job or to the workplace that is reasonably practicable and will enable a person living with HIV or AIDS to have access to or participate or advance in employment.
<i>STDs</i>	acronym for "sexually transmitted diseases". These are infections passed from one person to another during sexual intercourse, including syphilis, gonorrhea and HIV.
<i>Surveillance Testing</i>	This is anonymous, unlinked testing which is done in order to determine the incidence and prevalence of disease within a particular community or group to provide information to control, prevent and manage the disease.
